

Marc Negrón

Full-stack developer with a background in digital design looking for an opportunity in programming. With my experience in digital design and what I learned during the Rutgers Coding Bootcamp, I am confident I will develop user-friendly applications that are well designed and responsive.

EDUCATION

Rutgers Coding Bootcamp
Rutgers University
New Brunswick, NJ - 2022

Digital Design
NJIT
Newark, NJ

Associates Degree in Criminal Justice
Union County College
Cranford, NJ

PROJECT EXPERIENCE

PokeBeats

Summary: PokeBeats uses the PokeAPI and YoutubeAPI in tandem so users can read facts about a legendary Pokémon and listen to their respective song at the same time.

Responsibilities: I created the design for both the main and regions page. Also was the one who incorporated the PokeAPI into the website.

Tools: HTML, CSS, JavaScript, Bulma, Youtube API, Pokemon API

Hypochondriacs

Summary: Auction application that allows users to place bids on popular pandemic products.

Responsibilities: Mostly in charge of the Back-End such as the routes and models but also helped with the Front-End JavaScript and the design of the application.

Tools: CSS, JavaScript, Node.js, MySQL, Sequelize, Express.js, Inquirer.js, Handlebars

Weather Dashboard

Summary: Weather dashboard that runs in the browser and was created using the OpenWeather API to retrieve data for the cities searched.

Responsibilities: I created both the design and the script that allows the website to function.

Tools: HTML, CSS, JavaScript, OpenWeather API

WORK EXPERIENCE

Freelance

Digital Designer, January 2018 - March 2020
